**Everything**

Be part of the revolution . . .

# Faster Speeds. Greater Accuracy. MAST is revolutionizing Bible translation.

When it comes to Bible translation, there's a brand-new method called MAST (Mobilized Assistance Supporting Translation), and it's revolutionizing how translation gets done. Groups of national believers team up at a MAST workshop, receive tools and special training from Wycliffe Associates, and start a translation project in their heart language on day one. They work in parallel on different passages of the Bible, and the results are faster translation times and tremendous accuracy.

Do you have a solid foundation of Bible knowledge, good communication skills, and a love for travel? You could help start a new Bible translation and see the MAST method firsthand.

Wycliffe Associates needs MAST workshop facilitators to serve on a two- or three-week trip to empower the Church around the world to do Bible translation in their own mother tongue.

Call or visit the "Get Involved" section of our website for more information.
